

Summer 2023 HSP Math Assignment

5th, 6th, 7th, and 8th Grade

Your student received the summer math assignments during the last week of school. Please check with your student to make sure that they are aware and are prepared to complete the tasks. The Summer Learning Activity needs to be completed over the course of the summer with check-in points along the way, culminating with the start of the 2023-24 school year on **August 30th, 2023**.

The Summer learning goals should be brought back to school, the first week in the Fall. This will be the first graded assignment for the trimester in Math for 2023-24.

The Check-In dates are as follows:

June 30th, 2023.

July 30th, 2023.

August 30th, 2023. (Final Check in date/ 1st day of School 2023-24)

All students should complete the Diagnostic this week, before the beginning on the 1st check in date

(See attached template and directions below).

Please have your student log into IXL, select Diagnostic and then Enter the Arena. Completion of each of the Math Domains is indicated by a star. Each time they log in they should select the Recommended Skills from the Action Plan tab below the Arena tab. IXL identifies the skills your child should be developing and will track growth and customize the activities to their level. To help you better understand the levels, please find the *Diagnostic Action Plan Guide*. Each grade level will have a corresponding goal, for example rising 6th graders should have a goal of 600+ for the summer. Have your child complete the record sheet at the end of each checkpoint. Please sign at the bottom on the corresponding date, confirming completion of the tasks.. To help you keep track of your child's progress, you may go to the settings and add your email. IXL provides updates directly to you via email. We recommend that your student commit to a minimum 30 minutes a week of Math review or enrichment.

Please feel free to reach out if you have any questions, and have a great summer!
